Media Chain of Custody

- **What are the key chain of custody issues related to the proper management of moveable media facing government?**
- **What best practice solutions are public sector organizations incorporating?**
- **How do chain of custody methods fit within the organizational security and operations frameworks?**
- **What are some of the policies, practices and technologies used to facilitate chain of custody?**

The Department of Technology Services invites you to attend a presentation that will answer these questions.

Presentation By: Terry DiVittorio
Director of the Security and Privacy Division
Project Performance Corporation

Mr. DiVittorio provides strategic consulting and support to the US Intelligence Community, Department of Defense, and Federal Civilian Agencies. He is a Certified Information Systems Security Professional (CISSP) with over 20 years experience in commercial, military, intelligence communications and computer systems. He also has a comprehensive background in all security disciplines, risk mitigation and management, IT Systems Certification and Accreditation (C&A) processes, Continuity of Operations/Government, (COOP/COG) business continuity and contingency management.
